

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

Address:NO. 3, Yanhe Road, Boshan, Zibo, Shandong, China
Email:wp@cnjingganrefractory.com/sdwenping@163.com
Contact:Rose Tel/Wechat:+86-13275332819
Tel:86-533-4188518 Fax:86-533-4188518

Magnesium Aluminum Carbon Bricks For Ladle

1,Index:

Item	Index
MgO %	65
Al ₂ O ₃ %	15
C %	14
SiO ₂ %	1.7
Fe ₂ O ₃ %	1.0
CaO %	1.3
Porosity %	3.5
Cold crushing strength Mpa	62
B.D g/cm ³	3.05

2,Knowledge of Magnesium Aluminum Carbon Bricks For Ladle: Based on the traditional production of magnesia-alumina-carbon bricks, two major improvements have been made. one is to change the traditional binder into an environmental protection type alcohol-based binder, the second is to change the traditional baking temperature from 200°C±20 to 300°C±10, this improvement has the following advantages over traditional products. 1: with the change of binder, the product has become an environmentally protection product which is basically non-toxic and

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

harmless. In the process of masonry oven drying, the product has greatly improved the working environment, and users have a good evaluation of it. 2: with the increase of baking temperature, the density, porosity and strength of products are superior to those of traditional products, thus improving the use effect of products. users are very satisfied with these two improvements.

3, Application of Magnesium Aluminum Carbon Bricks For Ladle: ladle, electric furnace, torpedo car, converter, etc.

4, Product packaging: Thermal shrinkable film sealed packaging, moisture-proof, firm, easy to transport and protect the product from damage.

5, Damage factors in product application:

- 1) Slag in molten steel reacts with the product at high temperature, resulting in loosening of product structure, erosion hole or spalling.
- 2) The impact of molten steel on the surface of products
- 3) The high temperature effect of molten steel has an effect on the surface and internal structure of products.

6, About our production and supply of this product: according to the user's requirements, our factory has made improvements in the original production process, so that the products have better performance. For example, the density increases, the strength increases, the porosity is lower, and the masonry environment is improved, so the product meets the user's requirements and is well received. At present, the environmental protection magnesia-alumina-carbon bricks produced by our factory not only supply large domestic steel plants, but also export to Australia, Germany, Britain, Brazil and other countries.

7. Good feedback of product use effect, the products have been exported to Oman, the United States, Morocco and India.

8. The manufacturer is a professional manufacturer and can provide complete product index test reports or third-party test reports.
