Polycarbonate Stick Material

1, Main parameters

ITEM	UNIT	TECHNCIAL INDEX
Specific weight	g/cm3	1.18-1.20
Tensile strength	Mpa	≥66
Breaking elongation	%	50-100
Bending strength	Mpa	≥105
Compressive strength	Mpa	≥85
Impact strength	Kj/cm2	≥45
Melting temperature	℃	215-225
UV resistance linearity		Good

2. Brief introduction: polycarbonate PC Stick Material is a new type of thermoplastic resin, with a transparency of 90%, known as transparent metal. PC Stick Material has excellent impact toughness, mechanical strength, electrical properties and creep resistance, non-toxic, and good thermal stability at high temperature. Therefore, the products can be widely used instead of copper, brass, zinc and stainless steel.

3. Characteristics of Polycarbonate Stick Material

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

:

1) The surface of Polycarbonate Stick Material is covered with a layer of high concentration UV absorber, so it has good UV resistance, long-term weather resistance and never fade

2) Keep all physical indexes stable in the environment of - 40 °C - + 120 °C

3) Flame retardant performance reaches V-2 self extinguishing

4) High mechanical strength, good creep resistance, very high impact strength even at low temperature

5) Good electrical insulation

4. Application: mechanical industry, such as gear, rack, pulley, etc., electronic appliances, such as motor parts, electric bridge, electric valve, etc., optical engineering, such as large lampshade, signal lamp, others, such as safety helmet, textile bearing bush, medical equipment.

5.Good feedback of product use effect,the products have been exported to South Korea, Kenya, Mexico, Morocco

6.We are a professional supplier, who can provide customers with free product technology, use and other issues.

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
